

# WHY AQUIARRA® ALIGNERS ARE BETTER.

## Invisible Aligners

VS

## Metal Braces

- Invisible
- Removable
- More comfortable
- Easy to clean and maintain
- No diet restrictions

- Visible
- Fixed
- More painful due to brackets and wires
- Brushing and flossing require more effort
- Many diet restrictions

# Why Choose?

**AQUIARRA®**  
Your Smile, Your Choice

# Smile without inhibition.

## ABOUT AQUIARRA®

AQUIARRA is a Philippine-based company determined to earn your trust through providing excellent dentistry. We offer affordable and effective orthodontic treatment based on advanced technology, esthetic design, and comfortable alignment technique. Our aligners are not just custom-made to fit snugly on your teeth, but also customized to fit your individual needs and goals as they work to gradually straighten your teeth as you wear them with each set of aligners moving your teeth bit by bit to bring you closer to the smile of your dreams.

## WELCOME DOCTORS

Aquiarra has relentlessly worked with dental professionals and experts to formulate invisible aligners, made of carefully selected materials, clinically proven to deliver holistic teeth-straightening solutions. At Aquiarra, we are committed to providing you nothing but the best in terms of expertise and high-quality products and services. We started Aquiarra with the goal of providing patients the best orthodontic treatment possible to achieve a healthy, confident smile. We are keen on partnering with doctors who share the same passion and purpose to bring invisible aligners to more people, in more places. Let's create wonderful smiles together!

## WELCOME PATIENTS

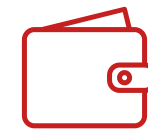

Invisible aligner therapy is an increasingly popular alternative to conventional metal braces. It is proven safe and effective in controlling and effecting orthodontic movement, thereby suitable for correcting different types of bite conditions. Besides, it is considered a far more ideal choice for individuals seeking to improve their smile without other people noticing due to its esthetic and discreet design, better comfort, as well as easier oral hygiene maintenance. Aquiarra aligners lets you smile without inhibition throughout treatment!

## HOW INVISIBLE ALIGNERS WORK

Invisible aligners are clear, removable, medical grade devices designed to gradually straighten teeth and correct different types of malocclusions, such as crossbite, overbite, and underbite, among others. First, aquiarra certified doctors perform 3D scanning or dental impression taking of the patient's mouth and submits this along with other relevant orthodontic information to Aquiarra for proper diagnosis and treatment planning. This ensures that the aligners will perfectly fit the patient's bite and gumline, which is crucial for the invisible aligner therapy to work. Then, Aquiarra provides the doctors the digital set-up, with the help of which, doctors and patients alike can envision the final outcome of the orthodontic treatment. Upon doctor's approval, Aquiarra begins manufacturing the custom-made aligners. Lastly, patients are instructed to wear their aligners in sequence as directed by their doctor until the desired smile is achieved. Note that treatment cost, treatment duration as well as the number of aligner trays prescribed varies and depends on a case-by-case basis.

## THE AQUIARRA® ADVANTAGE

### Affordable

Cost-effective treatment plan designed by highly trained orthodontists that will assist you in all aspects of treatment planning and review.

### Advanced

Aquiarra's cutting edge technology provides excellent teeth moving properties that can treat a wide range of cases.

### Durable

Our aligners are soft yet strong, and easy to maintain.

### Invisible

Aquiarra aligners are made of non-reflective material, making them virtually invisible to the eye.

### Removable

No dietary restrictions. Simply remove the aligners before eating or drinking colored beverages to avoid staining.

### Comfortable

No brackets and wires that can poke into the mouth or get in the way when flossing or brushing.
